

ENVIRONMENTAL POLICY

Mitsubishi Engine North America, Inc. is a distribution and sales center for industrial and marine engines and turbochargers and parts therefore. **Mitsubishi Engine North America, Inc.** is committed to being ethical, and responsible for the environment that we live and that many generations will enjoy because of our commitment to the environment. Observing the customer first principle, we will contribute to social progress through our business activities.

Distribution and sales of engines, turbochargers and parts therefore currently generates minimal amounts of solid and liquid wastes. Programs at **Mitsubishi Engine North America, Inc.** are designed to reduce the amounts of these wastes that are disposed of to landfills or incinerated. Recycling efforts are being developed for solid and liquid wastes. Top management reviews our programs twice a year to ensure **Mitsubishi Engine North America, Inc.** is upholding its commitment to the prevention of pollution.

Mitsubishi Engine North America, Inc. is committed to comply with Illinois Department of Environmental Protection, Federal, Local, and Other requirements that apply to environmental aspects of distribution and sales of engines, turbochargers and parts therefore.

Mitsubishi Engine North America, Inc. communicates this policy to all employees and persons working on behalf of our organization and ensures that the policy is available to the public.
