

**25th Anniversary of
Mitsubishi Engine North America, Inc.**

On February 5, 2010, Mitsubishi Engine North America, Inc. celebrated its 25th Anniversary. MENA is a premier marketing focused distributor of world famous Industrial and Marine Engines, Turbochargers and related parts for Mitsubishi Heavy Industries, Ltd., which is headquartered in Japan. Since that time, MENA has been offering uncompromised service and quality products to its customers.

MENA originated in a small office in Bensenville, IL so that Mitsubishi Heavy Industries, Ltd. could establish a presence for its Marine and Industrial Engines in North America. At that time, they warehoused only engine spare parts. As the demand for Mitsubishi Engines grew in North America, it was necessary for MENA to relocate to a much larger facility. In 1992 MENA moved to its present location in Addison, IL, and also acquired several warehouse locations throughout North America to be able to establish a vastly improved engine delivery time to their customers.

In 2002 MENA merged with the Mitsubishi Heavy Industries America Turbocharger Division. In 2008 MENA opened its first subsidiary overseas – MHI Sul Americana Distribuidora de Motores Ltda. in Sao Paulo, Brazil – to serve the South American region and in March 2010 the Turbocharger Department established a Detroit office in order to better support the automobile industry. Now - since its establishment in 1985 - MENA has grown to be able to offer its excellent products and services to the entire American continent!
